"Wireless Power Enables Dynamic Digital Displays in Smart Retail" Special Panel Discussion (30 Minutes)

Sanjay Gupta President & Chairman of the Board AirFuel Alliance

Description: Smart Retail aims to replace the current paper or plastic product detail tabs with dynamic digital tabs. This would allow retailers to sync their on-shelf displays with their database of products'

name, price, discount, and stocking -- enabling real-time updates and less manual logistics. With thousands of displays per building, standard wired power becomes unrealistic at scale and retailers are exploring the adoption of wireless power to enable these digital displays. <u>CLICK HERE</u> for more information on the AirFuel Alliance.
