Sustainability

**Description:** James Palmer shares real-world examples of how smart building technology can enable companies to:

- Enhance indoor air quality and promote occupant health and well-being, such as by using automation to maintain optimal temperature levels.
- Optimize space utilization to reduce costs, such as by using historical data to inform decisions about closing certain floors on specific days.
- Decrease energy consumption, such as by automatically turning off lights in unoccupied meeting rooms.
- Improve the employee experience, such as by preventing no-show meetings from monopolizing meeting room availability.
